

DIGITALBURJ

Complete Corporate Website, Subdomain & Platform Architecture

Updated master structure integrating the existing DigitalBurj company report and the expanded Academy model.

Document status: Proposed implementation blueprint. The 13 domain assignments, four divisions and foundational operating principles originate from the supplied company report. Detailed page paths, new professional Academy offerings and commercial arrangements are proposed structures, not claims of already launched features.

Architecture at a glance	Count / role
Corporate HQ	1 website
Primary divisions	4: Academy, Studio, Business AI, Verified Talent
Employment service	1: Jobs
Shared platform	3: Identity, unified workspace, API
Operations and governance	4: Admin, Support, Docs, Status
Total	13 domains and subdomains

Key rule: One company and connected platform, with distinct divisional experiences and shared accounts, authorization, operational services and evidence records.

01 / Master Domain Map

Layer	Domain	Role
Corporate	digitalburj.com	Company headquarters, portfolio, engagement
Division	academy.digitalburj.com	Technology and professional education
Division	studio.digitalburj.com	Software engineering and product delivery
Division	business.digitalburj.com	Business transformation and AI
Division	talent.digitalburj.com	Verified professional capability
Employment	jobs.digitalburj.com	Job discovery and recruitment
Shared	id.digitalburj.com	Authentication, sessions and organizations
Shared	app.digitalburj.com	Authenticated user workspace
Shared	api.digitalburj.com	Controlled platform service boundary
Operations	admin.digitalburj.com	Internal administration and governance
Operations	support.digitalburj.com	Customer and technical support
Operations	docs.digitalburj.com	Platform and API documentation
Operations	status.digitalburj.com	Availability, incidents and maintenance

All paths in the following sections are recommended route definitions. Public information pages remain distinct from authenticated transaction and administration surfaces.

02 / Corporate Headquarters

Domain: <https://digitalburj.com>

The corporate site represents the complete technology company, explains its operating model, showcases its divisions and portfolio, and routes visitors to the appropriate service.

Public website and page structure

/ - Corporate homepage: company, ecosystem, technology, products, people and engagement

/company/about - Company overview

/company/mission - Mission and vision

/company/our-approach - Operating philosophy and process

/company/leadership - Leadership and operating responsibilities

/company/careers - DigitalBurj corporate vacancies

/ecosystem/academy - Academy overview; links to Academy site

/ecosystem/studio - Studio overview; links to Studio site

/ecosystem/business-ai - Business AI overview; links to Business site

/ecosystem/verified-talent - Talent overview; links to Talent site

/technology/* - Engineering, AI, enterprise systems, platform, security and reliability

/portfolio - Portfolio directory; individual verified product overviews

/industries/* - Relevant sectors and applications

/get-started - Intent-based entry point for learner, founder, business, employer and job seeker

/contact - Corporate enquiries

/privacy and /terms - Applicable legal notices

Primary user journey

Discover company → Choose engagement → Visit division → Sign in when needed

Corporate homepage sequence

Introduction → About → Four divisions → How DigitalBurj works → Technology → Portfolio → Industries → People → Get started. The primary navigation is Home / Company / Ecosystem / Technology / Portfolio / Contact, with Sign In and Get Started actions.

Portfolio directory

Include individual pages for LoadByTon, VelozTrade, The Imam Collective, Rootiva Herbal, Procurazo, Attesora, HospyQ, Elite Escape, MedinaBridge and Resilianta. Describe each accurately according to its verified project status; the source report does not establish that every portfolio project is commercially launched.

03 / Academy: Public Catalogue & Programs

Domain: <https://academy.digitalburj.com>

Academy provides existing DB-00 to DB-22 technology curriculum alongside proposed professional career training, affordable individual courses and career bundles. Both share one learning and assessment system.

Public website and page structure

/ - Academy homepage; course discovery, bundles and learning pathways

/about - About the Academy and learning model

/courses/technology - Existing technology curriculum and individual courses

/courses/professional - Professional and industry-specific course catalogue

/courses/business - Business and professional operations courses

/courses/all-courses - Unified searchable course catalogue

/career-bundles/technology - Technology career bundle catalogue

/career-bundles/professional - Professional career bundle catalogue

/career-bundles/international-careers - International career-readiness bundles

/programs/technology-academy - Technology Academy overview

/programs/professional-career-academy - Professional Career Academy overview

/programs/advanced-professional-academy - Advanced programs

/learning-paths/* - After 12th grade, graduation, career change, working professionals, international careers and business owners

/international-careers - Workplace readiness and country-specific modules

/certifications - Course completion, assessment and evidence standards

/how-it-works - Learning and verification methods

/pricing - Single-course, bundle and advanced program pricing

/scholarships - Scholarship eligibility and available assistance

/courses/{slug} - Reusable individual course detail template

/career-bundles/{slug} - Bundle detail, inclusion list and price

/enroll - Enrollment entry point; signs in through central identity

Authenticated workflows / workspace

/academy - Student overview and learning recommendations

/academy/my-courses - Purchased courses and lessons

/academy/my-bundles - Purchased bundles; recognize courses already owned

/academy/learning-paths - Pathway progress and prerequisites

/academy/assessments - Submissions, results and reviewer feedback

/academy/credentials - Issued completion and assessment credentials

/academy/progress - Learning progress, projects and evidence

Primary user journey

Find course or bundle → Review prerequisites and price → Create account / sign in → Purchase or enroll → Learn and practice → Submit assessment → Receive eligible completion or evidence record

Technology Academy: existing program map

Preserve DB-00 to DB-22 as program identifiers. Convert each into coherent, individually purchasable courses; assemble relevant courses into career bundles without duplicating learning records.

Program family	Existing units
Foundations, product and software	DB-00 to DB-03; DB-09 to DB-11
AI, data, cloud, security and quality	DB-04 to DB-08; DB-12
Business systems, mobile, search and content	DB-13 to DB-16
Product, transformation and professional practice	DB-17 to DB-22

Proposed initial technology bundles and USD prices

Career bundle	Proposed USD
Digital Foundations	\$25
Frontend Developer	\$49
Backend Developer	\$59
AI Automation & Applications	\$59
Data Analyst Foundation	\$49
Digital Marketing	\$49
Business Systems Specialist	\$49

Professional Career Academy: course categories

Office administration; accounting and bookkeeping; banking and financial services; insurance; real estate and property management; freight forwarding and logistics; import/export; document clearing and government-services administration; immigration administration; HR and recruitment; payroll; procurement and purchasing; warehouse and inventory; sales; customer service; retail; hospitality; travel and tourism; healthcare administration; facilities management; construction administration; e-commerce; SME operations.

Proposed professional career bundle catalogue

Bundle	Proposed USD
Professional Office Foundations	\$29
Office Administration	\$39
Accounting & Bookkeeping	\$49
Real Estate & Property Management	\$49
Freight Forwarding & Logistics	\$59
Document Clearing & Government Services	\$49
Banking Operations	\$59
Insurance Operations	\$49
Immigration Administration	\$49
Human Resources & Recruitment	\$49
Procurement & Purchasing	\$39
Customer Service & Call Centre Operations	\$29
SME Business Operations	\$39
Warehouse & Inventory Management	\$39
E-Commerce Operations	\$39
Travel & Tourism Operations	\$39
Healthcare Administration	\$39

Individual course and bundle rules

Each course should have an overview, audience, prerequisites, outcomes, syllabus, duration, exercises, assessment rules, evidence requirements, purchase price and applicable bundle links. Each bundle should list included course IDs, prerequisites, total learning time, final practical project, assessment and purchase terms. Suggested pricing bands: \$3-\$15 individual courses; \$25-\$59 standard career bundles; \$69-\$99 advanced programs. All are launch proposals requiring validation.

International career readiness

Provide professional English, business communication, CV preparation, interviews, employment documents, workplace culture, financial planning and employment-fraud awareness, plus separately reviewed country modules for UAE, Saudi Arabia, Qatar, Oman, Bahrain, Kuwait, India, Pakistan and Bangladesh. Do not represent one jurisdiction's employment, immigration or licensing rules as universal.

Assessment and credentials

Retain the Academy's evidence-led sequence: Brief / Learn / Investigate / Try / Build / Break / Fix / Test / Explain / Defend / Ship / Evidence. Adapt this to workplace scenarios. Distinguish course completion, assessed competence, independently verified evidence and real professional experience. Verification remains independent of submission approval; qualifications do not imply professional licensing or guaranteed employment.

04 / Software Studio

Domain: <https://studio.digitalburj.com>

Software product development and technical delivery, following discovery, validation and a build / reshape / stop decision before larger execution.

Public website and page structure

/ - Studio homepage

/about - Studio mission and delivery approach

/services/software-development - Software development

/services/web-applications - Web applications

/services/mobile-applications - Mobile applications

/services/enterprise-software - Enterprise software

/services/saas-development - SaaS applications

/services/mvp-development - MVP development

/services/api-development - API engineering

/services/system-integrations - System integration

/services/technical-architecture - Technical architecture

/product-development/* - Discovery, validation, planning, development, testing, deployment and maintenance

/industries - Industry experience

/portfolio - Relevant verified work

/how-we-work - Engagement methodology

/start-a-project - Project enquiry and discovery intake

/client-login - Authenticated workspace entry

Authenticated workflows / workspace

/studio/projects - Client project overview

/studio/milestones - Project milestones and progress

/studio/deliverables - Deliverable records and reviews

/studio/reviews - Acceptance, change requests and assurance

Primary user journey

Enquiry → Discovery → Validation → Build / reshape / stop → Approve scope → Develop → Test and verify → Launch and measure

05 / Business AI & Transformation

Domain: <https://business.digitalburj.com>

Diagnose measurable operational loss, design improved business workflows, implement appropriately bounded automation and measure outcomes.

Public website and page structure

/ - Business AI homepage

/about - Business unit overview

/solutions/ai-automation - AI-enabled workflows

/solutions/business-process-automation - Process automation

/solutions/crm-systems - CRM operations

/solutions/sales-automation - Lead and sales workflow

/solutions/customer-service-automation - Customer service workflows

/solutions/document-automation - Document operations

/solutions/workflow-engineering - Workflow design

/solutions/data-and-reporting - Reporting and analytics

/solutions/enterprise-ai-integration - Business application integration

/industries/* - Real estate, logistics, finance, healthcare, retail, professional services and SMEs

/our-approach/* - Discovery, diagnosis, design, implementation and measurement

/case-studies - Verified outcomes only

/consultation - Consultation intake

/client-login - Authenticated workspace entry

Authenticated workflows / workspace

/business/engagements - Client engagements

/business/projects - Approved projects and milestones

/business/workflows - Authorized workflow status

/business/reports - Operational measurement and results

Primary user journey

Enquiry → Observe work → Identify and quantify loss → Design workflow → Approve scope → Implement → Human approval where needed → Measure

06 / Verified Talent

Domain: <https://talent.digitalburj.com>

Evidence-backed professional profiles and employer discovery, with clear separation between self-reported experience and independently reviewed capability.

Public website and page structure

/ - Talent homepage

/explore-talent - Professional directory and role/category filters

/professionals/create-profile - Professional enrollment entry

/professionals/verified-skills - Skill and verification explanation

/professionals/project-evidence - Evidence submission overview

/professionals/assessments - Assessment overview

/professionals/capability-passport - Capability passport explanation

/employers/register - Employer onboarding

/employers/verification - Employer verification

/employers/search-talent - Authorized talent discovery

/employers/shortlist - Employer shortlist entry

/employers/request-assessment - Additional assessment request

/how-verification-works - Verification criteria and status

/login - Central identity entry

Authenticated workflows / workspace

/talent/profile - Professional profile

/talent/skills - Verified and self-reported skills, separately labeled

/talent/evidence - Evidence records and permitted visibility

/talent/availability - Availability and privacy controls

Primary user journey

Create profile → Add experience and evidence → Assessment / verification where applicable → Control visibility → Employer searches → Review and shortlist

07 / Jobs & Recruitment

Domain: https://jobs.digitalburj.com

A connected opportunity marketplace for professionals and employers; an Academy credential is not required for every applicant.

Public website and page structure

/ - Jobs homepage

/jobs - Search and browse job listings

/jobs/{category} - Industry and role categories

/jobs/{job-id} - Job details and requirements

/job-seekers - Candidate entry point

/employers - Employer entry point

/employers/register - Employer registration

/employers/company-verification - Organization verification

/career-resources - Practical career information

/login - Central identity entry

Authenticated workflows / workspace

/jobs/applications - Candidate application status

/jobs/saved-jobs - Saved opportunities

/jobs/interviews - Interview invitations

/jobs/job-listings - Employer listing management

/jobs/candidates - Employer applicant review

/jobs/recruitment - Shortlist and recruitment stages

Primary user journey

Candidate profile or employer verification → Find or post job → Apply / review → Assessment when needed → Interview → Employer hiring decision

08 / Central Identity

Domain: <https://id.digitalburj.com>

One account across divisions. Secure authentication, email confirmation, MFA, organization membership, sessions and account recovery.

Public website and page structure

/login - Sign in

/register - Create account

/verify-email - Email confirmation

/forgot-password - Recovery initiation

/reset-password - Password reset

/mfa - Multi-factor challenge

/account/profile - Account information

/account/security - Security preferences

/account/sessions - Active-session management

/organizations/create - Create organization

/organizations/join - Join invited organization

/organizations/members - Authorized member management

/organizations/switch - Select active organization

Primary user journey

Choose intent → Register and verify → Secure account → Enroll or join organization → Enter authorized workspace

Onboarding intents may include learner, software customer, business customer, professional, job seeker and employer. These must not become mutually exclusive accounts or substitute for permission-based authorization.

09 / Unified Authenticated Workspace

Domain: <https://app.digitalburj.com>

One signed-in destination for personal and organizational activity. Show modules according to actual server-enforced permissions and current engagements.

Public website and page structure

/dashboard - Personalized overview
/organizations - Membership and organization switching
/messages - Authorized conversation records
/notifications - Cross-platform notifications
/files - Controlled personal / organization documents
/billing - Invoices and payment records
/support - Support request overview
/settings - Account preferences

Authenticated workflows / workspace

/academy/* - Learning, assessments and credentials
/studio/* - Client project delivery
/business/* - Business AI engagements
/talent/* - Capability and evidence management
/jobs/* - Applications and recruitment

10 / Internal Administration

Domain: <https://admin.digitalburj.com>

Restricted operations for approved internal personnel. Never treat a visible frontend menu as sufficient authority.

Public website and page structure

/dashboard - Operational overview
/users - Accounts and access
/organizations - Organization governance
/academy/programs - Curriculum units and prerequisites
/academy/courses - Course catalogue and versioning
/academy/course-bundles - Bundling and course reuse
/academy/students - Enrollment management
/academy/assessments - Assessment queue and results
/academy/verification - Independent evidence verification
/academy/credentials - Credential issuance and history
/academy/pricing - Course and bundle pricing
/academy/discounts - Discount and entitlement rules
/academy/scholarships - Scholarship administration
/studio/* - Client, project, milestones, deliverables and assurance
/business/* - Business engagements, workflows and measurement
/talent/* - Profiles, evidence and employer access
/jobs/* - Employer verification, listings and recruitment
/finance/* - Transactions, invoices, refunds and reporting
/security/* - Roles, permission checks and audit events
/support - Support management

/settings - Restricted platform configuration

Academy administrative rule: create a course once in the canonical catalogue and include it in multiple bundles when suitable. Preserve a learner's single course progress and evidence record. Independent verifiers must be distinct from initial approvers on relevant submissions.

11 / Support & Service Management

Domain: <https://support.digitalburj.com>

Route requests by division, category, urgency and authorized account or organization.

Public website and page structure

/ - Help center

/academy - Learner and course support

/studio - Project support

/business-ai - Business engagement support

/talent - Profile and verification support

/jobs - Employer and applicant support

/account-and-billing - Account and transaction support

/submit-ticket - New support case

/my-tickets - Authenticated case history

/knowledge-base - Help articles

/contact - Support contact

12 / Documentation

Domain: <https://docs.digitalburj.com>

Central product, technical, integration and operational documentation with access controls for restricted material.

Public website and page structure

/ - Documentation home

/getting-started - Platform onboarding guides

/platform - Shared platform concepts

/academy - Academy integration and operating guides

/studio - Studio product documentation

/business-ai - Business AI usage and controls

/talent - Talent and evidence documentation

/jobs - Jobs and recruitment documentation

/developers/api - API overview and reference

/developers/authentication - Authentication and permission model

/developers/integrations - Integration guides

/developers/webhooks - Webhook contracts

/developers/error-handling - API errors

/security - Public security statements as appropriate

/operations - Restricted operational materials

13 / API & Integration Boundary

Domain: <https://api.digitalburj.com>

A controlled API boundary for shared and domain-specific capabilities. The routes below are proposed logical groups, not verified deployed endpoints.

Public website and page structure

/v1/identity - Identity-related API functions

/v1/organizations - Membership and organization services

/v1/academy/programs - Academic program units

/v1/academy/courses - Canonical courses

/v1/academy/bundles - Course bundles

/v1/academy/enrollments - Enrollment entitlements

/v1/academy/assessments - Submissions and grading state

/v1/academy/credentials - Issued records and evidence

/v1/studio - Studio project resources

/v1/business - Business engagement resources

/v1/talent - Profiles, skills and evidence

/v1/jobs - Listings, applications and employers

/v1/files - Controlled document access

/v1/billing - Billing records and operations

/v1/notifications - Notifications

/v1/support - Support requests

Shared engineering controls: server-side authorization, tenant isolation, idempotency for risky mutations, audited evidence issuance, secure file handling, notifications, observed services and tested recovery. AI workflows should additionally use approved models, privacy and cost controls, evaluation and human review when appropriate.

14 / Platform Status

Domain: <https://status.digitalburj.com>

Public operational information for service availability, confirmed incidents and scheduled maintenance.

Public website and page structure

/ - Current platform status

/services - Service list: corporate, identity, workspace, Academy, Studio, Business AI, Talent, Jobs and API

/incidents - Active incident reports

/incident-history - Historical incidents

/scheduled-maintenance - Planned changes

/service-updates - Operational announcements

15 / Cross-domain User Journeys

Learner to verified professional

Corporate or Academy discovery → course/bundle selection → central identity → enrollment → Academy workspace → practical assessment → independent verification where applicable → controlled Talent profile → optional Jobs application.

Software customer

Corporate / Studio discovery → enquiry → discovery and validation → build / reshape / stop decision → approved scope → Studio workspace → engineering and assurance → deployment and measurement.

Business AI customer

Corporate / Business AI enquiry → operational diagnosis → measured business problem → approved solution → authorized Business workspace → deployment → performance measurement.

Employer

Talent or Jobs entry → central identity and organization verification → talent search or job post → evidence and application review → interviews → employer hiring decision.

16 / Implementation Sequence

Phase	Scope
1	Identity, organizations, sessions, authorization
2	Shared app shell, audit, files, notifications, billing
3	Corporate site and divisional public information pages
4	Academy catalogue, proposed pricing and course/bundle purchases
5	Academy lessons, projects, assessments and credentials
6	Studio and Business AI engagement workspaces
7	Verified Talent and Jobs integration
8	Admin, support, documentation, API and status
9	Security, quality assurance, recovery and independent verification

Publication and deployment note: This PDF describes the target structure. Planned programs, proposed prices, unverified product maturity, professional licensing, visas and employment outcomes must not be presented as existing or guaranteed.
